Module 2.1: Local area networks ...74	2
Module 2.2: The browsing experience ...85	2
Module 2.3: Online lifestyle ...91	3
Module 2.4: Managing email ...107	4
Section 3: Word Processing ...115	
Module 3.1: Working with files ...116	1
Module 3.2: Page formatting ...125	1
Module 3.3: Paragraph formatting ...136	1
Module 3.4: Forms and templates ...145	1
Module 3.5: Styles ...152	2
Module 3.6: Mail merge ...159	3
Module 3.7: Referencing ...165	3
Section 4: Spreadsheets ...179	
Module 4.1: Revising and improving skills ...180	1
Module 4.2: Calculations ...189	1
Module 4.3: Decisions and charts ...200	2
Module 4.4: Other facilities ...207	3
Section 5: Databases ...217	
Module 5.1: Introduction to databases ...218	1
Module 5.2: Forms ...234	1
Module 5.3: Queries ...243	2
Module 5.4: Designing a database table ...253	2
Module 5.5: Reports ...265	3
Section 6: HTML / Web design ...279	
Module 6.1: Basic concepts of web design ...280	2
Module 6.2: More web design techniques ...291	3
Section 7: Information Management ...303	
Module 7.1: Finding information ...304	2
Module 7.2: Processing data ...316	3
Module 7.3: Presenting results ...326	4
Section 8: Integrated Skills ...331	
Module 8.1: Working smarter ...332	4
Module 8.2: Case studies ...342	4

TABLE OF CONTENTS

Section 1: System Technologies and Implications	1
Module 1.1: It's all about ICT	2
The role of ICT in the workplace	2
CAT – a most valuable subject!	3
The computer	3
Protecting your information	6
Module 1.2: Input and output.....	11
Input	11
Output.....	20
Interactive whiteboards	25
What makes it all work?	26
Input and output for physically challenged users	26
Input and output and health issues	27
Module 1.3: Storage, memory and processing.....	34
Memory and storage	34
Processing.....	40
Module 1.4: Software.....	46
Application software	46
Compatibility issues.....	47
Software bugs	48
Updating your software	49
Online software	49
Software for physically challenged users	51
Module 1.5: Computer management	55
System requirements	55
Software installation	56
Managing files	58
Dealing with hardware failure	61
Module 1.6: The dark side of computing	65
Human and social aspects	65
The criminal side of things.....	67
Section 2: Network and Internet Technologies	73
Module 2.1: Local area networks.....	74
Types of networks	74
Basic components of a network	74
Advantages and disadvantages of a LAN	79
Basic network security.....	80
Ethical use of networks	80
Module 2.2: The browsing experience	85
Introduction.....	85
The usability of websites	85
Other factors that affect the browsing experience.....	87

Module 2.3: Online lifestyle	91
Internet access	91
Digital communications	93
Online services	98
Protecting yourself online	99
Workplace and employment practice	102
Module 2.4: Managing email	107
Email access	107
Searching your email	108
Flagging email messages.....	109
Grouping messages into folders.....	110
Automating with filters / rules	111
Contact groups	112
Section 3: Word Processing	115
Module 3.1: Working with files	116
General file commands	116
Importing from other file formats	119
Help	120
Editing	121
Module 3.2: Page formatting	125
Understanding and using sections	125
Headers and footers.....	128
Themes	132
Cover page.....	133
Module 3.3: Paragraph formatting	136
Lists with bullets and numbering	136
Customised spacing.....	140
Module 3.4: Forms and templates	145
Word forms.....	145
Templates	149
Module 3.5: Styles	152
What is a style?	152
Using existing styles.....	153
Changing and creating styles	155
Module 3.6: Mail merge	159
How mail merge works	159
Steps that must be followed	160
Module 3.7: Referencing	165
Table of contents	165
Footnotes	167
Captions	169
Citations and bibliography	170
Index.....	173

Section 4: Spreadsheets	179
Module 4.1: Revising and improving skills.....	180
Overview of basic concepts.....	180
Conditional formatting	181
Auto Fill facility	183
Cell referencing	184
Module 4.2: Calculations.....	189
Functions.....	189
Interpretation of error indicators	196
Module 4.3: Decisions and charts.....	200
The IF function	200
Charts.....	202
Module 4.4: Other facilities.....	207
Copying cells	207
Handling a worksheet as a whole	208
Linking data in worksheets	212
Excel's help function.....	213
Section 5: Databases	217
Module 5.1: Introduction to databases.....	218
Introduction	218
The structure of a database	218
First encounter with Access	219
Working with tables	222
Creating a table	225
Module 5.2: Forms	234
Introduction.....	234
Viewing and using an existing form.....	234
The sections in a form.....	235
Creating a new form.....	236
Improving an existing form	237
Photographs as fields in a database	239
Module 5.3: Queries	243
The design and result of a query.....	243
Formulation of simple criteria	245
Creating a query.....	246
Queries with criteria for different fields	248
Module 5.4: Designing a database table	253
Introduction.....	253
Design of the basic table structure	253
Refining the table structure	255
Design for valid data capture	257
Why is accurate design important?	263

Module 5.5: Reports	265
First acquaintance with a report	265
Different sections of a report	266
Creating a basic report	267
Changing the appearance of a report	269
Creating reports with groupings	271
Calculations in a report	273
Section 6: HTML / Web design	279
Module 6.1: Basic concepts of web design	280
Introduction.....	280
How is HTML used to create a web page?.....	280
The structure of an HTML file	282
Basic markup tags.....	284
Creating formatted web pages	285
Module 6.2: More web design techniques	291
Introduction.....	291
HTML attributes	291
Formatting the text on a web page.....	293
Adding images	294
Creating lists.....	295
Creating a website.....	296
Section 7: Information Management	303
Module 7.1: Finding information	304
Introduction.....	304
Formulating a task definition	305
Determining what data and information is needed	306
Surveys for collecting data	308
Checking the quality of information	311
Module 7.2: Processing data	316
Introduction.....	316
Exporting and importing	316
Tips, tools and techniques to process data	320
Module 7.3: Presenting results	326
Introduction.....	326
Different ways of reporting	327
Creating a report	327
Section 8: Integrated Skills	331
Module 8.1: Working smarter	332
Integration	332
Using templates to work smarter	333
Using <i>Excel</i> to solve problems	334
Using <i>Access</i> to solve problems	337
Module 8.2: Case studies	342
Introduction	342
Scenario: Hockey tournament.....	342
Think, Interpret, Explain	346
