CONTENTS

<i>Section 1: System technologies</i>	1
Module 1.1: Hardware	2
Module 1.2: Software	20
Module 1.3: Computer management – safe-guarding our data	35
<i>Section 2: Communication and Internet Technologies</i>	51
Module 2.1: Networks.....	52
Module 2.2: E-communications.....	64
Module 2.3: The Internet and the WWW.....	76
Module 2.4: Internet Services Technologies.....	86
<i>Section 3: Social Implications</i>	97
Module 3.1: ICT and society	98
Module 3.2: IT and the workplace.....	107
Module 3.3: The impact of technology on the global community	116
<i>Section 4: Data and Information Management</i>	121
Module 4.1: Introduction to databases.....	122
Module 4.2: Database management	139
Module 4.3: Introduction to multi-tables.....	146

TABLE OF CONTENTS

<i>Section 1: System technologies</i>	1
Module 1.1: Hardware	2
Introduction	2
The motherboard	2
Modular design, Components on the motherboard	
Data transmission	9
System clock, Bus, Point-to-point connections, Data transfer to peripherals via USB	
Caching	12
Types of caching, Purpose of caching	
Storage	15
Description, role and characteristics, Types of storage	
Glossary	18
Module 1.2: Software	20
Operating systems	20
Examples of operating systems, Overview of processing techniques	
Virtual memory	26
Programming languages	28
Program compatibility, Types of programming languages, Compilers versus interpreters	
Virtualisation	31
Glossary	34
Module 1.3: Computer management – safe-guarding our data	35
Importance of data and information	35
Categories of threats to data	35
Unauthorised access to data, Malware threats, Human issues, Natural disasters, Hardware issues, Software issues	
Ways of combating the threats	40
Backup – the first line of defence, Restricting access to data, Reducing malware threats, Reducing the ‘human risk’ factor, Dealing with hardware issues, Designing quality software	
Glossary	49

<i>Section 2: Communication and Internet Technologies</i>	51
Module 2.1: Networks	52
The physical aspects of a network.....	52
Network Interface Controller, Wired data transmission media, Wireless data transmission media	
Terms used to describe networks by their size	57
Personal Area Network, Home Area Network, Local Area Network, Wide Area Network	
Overview of network innovation.....	59
Voice over Internet Protocol (VoIP), Virtual Private Networks (VPN), Location-based computing	
Glossary	62
Module 2.2: E-communications	64
Introduction.....	64
Mobile technology	64
Mobile devices, Getting the most from your mobile operating system, Mobile browsers	
Mobile or wireless e-communication.....	67
E-mail, Blogging, Microblogging, SMS, Instant Messaging, VoIP and video conferencing, Media creation	
Wireless technologies	70
GPS, Bluetooth	
Protocols	71
Glossary.....	74
Module 2.3: The Internet and the WWW	76
Introduction	76
The evolution of the Internet	76
Type of Internet connection, Websites	
Multimedia as part of Internet technologies.....	79
Download versus streaming, Live broadcasts, Video on demand and Internet Protocol Television, Compression of media files	
Glossary	84

Module 2.4: Internet Services Technologies	86
Introduction.....	86
Types of websites	86
Static versus dynamic, Location-based services sites, Accessibility of websites on mobile devices	
Supporting technologies	89
RSS (Really Simple Syndication), SEO (Search Engine Optimisation), RIA (Rich Internet Applications), Security services	
Internet vs. intranet vs. extranet	91
Internet-related careers	91
Web designer, Web author, Graphics and multimedia designer	
Glossary.....	95
 <i>Section 3: Social Implications.....</i>	 <i>97</i>
Module 3.1: ICT and society.....	98
Introduction.....	98
Managing network use.....	98
Policies, restrictions and firewalls, End-user AUP documents	
Where does ICT make the biggest difference?.....	100
Worldwide communication, Improvement of the efficiency of the government, Environmental improvements	
Capabilities and limitations of ICT	102
What is ICT capable of?, What is ICT limited by?	
Glossary.....	106
Module 3.2: IT and the workplace	107
Introduction	107
The costs and benefits of computerising.....	107
IT, the workplace and employment practices.....	108
What does IT bring to the workplace?, The effect of IT on the workplace, The global village – work from anywhere	
IT-based careers.....	112
Glossary	114
Module 3.3: The impact of technology on the global community.....	116
Introduction	116
What is globalisation?	116
Technologies that enable globalisation	117
The impact of globalisation on society	119

<i>Section 4: Data and Information Management</i>	121
Module 4.1: Introduction to databases	122
What is a database?	122
Structure of a database, Practical example using Microsoft Access	
Data maintenance and generation of information	126
Data maintenance, Generating information from a database	
Creating a simple database	127
Different views of a table, Field types and properties, Creating a table in Access	
Designing a database table	131
Design of the basic table structure	
The importance of data and information	134
Data, information, knowledge and decision making, Characteristics of quality data, Data validation to improve the quality of data, Qualities of valuable information	
Glossary	137
Module 4.2: Database management	139
Introduction	139
DBMS.....	139
Desktop databases versus server databases, Distributed databases, Examples of DBMS software	
Database-related careers	143
Glossary	145
Module 4.3: Introduction to multi-tables	
Introduction.....	146
Data redundancy	146
Data redundancy as a disadvantage of a single table, Using multiple tables to eliminate data redundancy	
Designing multiple tables and relationships.....	148
Determining the main entities, Relationships, Representing relationships with ER diagrams	
Linking tables in Access	154
Creating a relationship in Access, Maintenance of relationships, Errors when creating relationships	
Database design	161
Potential problems or errors, Reasons for anomalies and problems during processing	
Queries on multiple tables	167
Glossary	169
