

# CONTENTS

	Term
<b>Section 1: System Technologies and Implications 1</b>	
Module 1.1: It's all about ICT 2	1
Module 1.2: Input and output 13	1
Module 1.3: Memory, storage and processing 24	2
Module 1.4: Software 33	3
Module 1.5: Computer management 42	3
Module 1.6: The dark side of computing 51	4
<b>Section 2: Network and Internet Technologies 65</b>	
Module 2.1: Local area networks 66	2
Module 2.2: The browsing experience 76	3
Module 2.3: Online lifestyle 80	3
Module 2.4: Our changing world 91	3
Module 2.5: Managing email 102	4
<b>Section 3: Word Processing 109</b>	
Module 3.1: Working with files 110	1
Module 3.2: Paragraph formatting 122	1
Module 3.3: Page formatting 131	1
Module 3.4: Tables, forms and templates 144	1
Module 3.5: Styles 153	2
Module 3.6: Mail merge 160	3
Module 3.7: Referencing 167	3
<b>Section 4: Spreadsheets 179</b>	
Module 4.1: Revising and improving spreadsheet skills 180	1
Module 4.2: Calculations 188	1
Module 4.3: Decisions 199	2
Module 4.4: Charts 207	2
Module 4.5: Working with worksheets 213	3
<b>Section 5: Databases 221</b>	
Module 5.1: Introduction to databases 222	1
Module 5.2: Forms 237	1
Module 5.3: Queries 247	2
Module 5.4: Designing a database table 257	2
Module 5.5: Reports 268	3
<b>Section 6: HTML / Web design 277</b>	
Module 6.1: Basic concepts of web design 278	2
Module 6.2: More web design techniques 285	3
<b>Section 7: Information Management 295</b>	
Module 7.1: Artificial Intelligence 296	2
Module 7.2: Finding information 304	2
Module 7.3: Processing information 311	3
Module 7.4: Presenting results 321	4
<b>Section 8: Integrated Skills 325</b>	
Module 8.1: Working smarter 326	4
Module 8.2: Case studies 336	4

# TABLE OF CONTENTS

---

<b>Section 1: System Technologies and Implications .....</b>	<b>1</b>
<b>Module 1.1: It's all about ICT .....</b>	<b>2</b>
The role of ICT in the workplace .....	2
CAT – a most valuable subject! .....	3
Computers and computing devices .....	4
Desktop computers, Portable computers, Wearables / Smart sensors, Servers, Supercomputers	
Protecting your computing devices .....	9
Hardware theft and protection, Protection against power failures	
<b>Module 1.2: Input and output .....</b>	<b>13</b>
Input .....	13
Biometric input, Barcode scanner, Microphones, Touch screens (as input devices), Virtual keyboards	
Output .....	16
Display devices, Printers	
Input and output at ATMs .....	18
Input and output for POS systems .....	19
Input and output devices for users with disabilities .....	20
Input and output and health issues .....	21
<b>Module 1.3: Memory, storage and processing .....</b>	<b>24</b>
Memory and storage .....	24
What are memory and storage?, Cloud storage, Storage media for backup	
Processing .....	27
Interpreting adverts .....	28
Basic troubleshooting .....	29
<b>Module 1.4: Software .....</b>	<b>33</b>
Application software .....	33
Collaboration software, Communication software	
Software versions – issues and solutions .....	34
Software bugs, Updating your software, Compatibility issues, Upgrades vs subscription	
Cloud-based applications .....	36
Software for users with disabilities .....	37
General options for enhancing accessibility, Screen readers, Voice recognition software	
<b>Module 1.5: Computer management .....</b>	<b>42</b>
System requirements .....	42
Software installation .....	43
How to install software, Uninstalling software	
Managing files .....	45
Finding files in Windows, Other ways to manage files	
Dealing with hardware failure .....	49

<b>Module 1.6: The dark side of computing .....</b>	<b>51</b>
The importance of accurate information .....	51
Why is information accuracy important?, Data protection	
Computer misuse .....	53
Online harassment, Social engineering, Unauthorised access and data misuse, Malware	
Protecting oneself when online .....	59
Malware and security software, Multi-step verification, Monitoring your apps, Safe e-commerce	
<b>Section 2: Network and Internet Technologies .....</b>	<b>65</b>
<b>Module 2.1: Local area networks .....</b>	<b>66</b>
Types of networks .....	66
Basic components of a network .....	66
Computing devices, Network devices, Communication methods	
Advantages and disadvantages of a LAN .....	71
Basic network security .....	73
Ethical use of networks .....	73
<b>Module 2.2: The browsing experience .....</b>	<b>76</b>
Introduction .....	76
The usability of websites .....	76
Navigation, Layout, Typography, Readability, Consistency	
<b>Module 2.3: Online lifestyle .....</b>	<b>80</b>
Portable and mobile internet access .....	80
WiFi hotspots, Cellular networks, Cellular data for laptops / desktops, The satellite alternative	
Types of digital communications .....	82
VoIP and video conferencing, Social network websites	
Online commerce services .....	87
Internet banking, Shopping and reservations	
<b>Module 2.4: Our changing world .....</b>	<b>91</b>
Introduction .....	91
The digital transformation of work .....	92
Remote office, Office automation, The gig economy – a new way of working	
The Internet of Things .....	94
Basic concepts, Where is IoT used?, Other technologies involved in IoT, Impact of IoT	
Virtual Reality and Augmented Reality .....	97
Virtual Reality, Augmented Reality	
What is 4IR? .....	98
Embracing the change .....	99
<b>Module 2.5: Managing email .....</b>	<b>102</b>
Sending email .....	102
Address book, Cc and Bcc Fields, Attachments, Contact groups	
Searching your email .....	104
Flagging email messages .....	104
Grouping messages into folders .....	105
Creating labels / folders, Assigning a label	
Automating with filters / rules .....	107

<b>Section 3: Word Processing .....</b>	<b>109</b>
<b>Module 3.1: Working with files .....</b>	<b>110</b>
Introduction .....	110
Help facilities .....	110
Work independently, Online help	
File properties and commands .....	111
File properties, The Save commands, The Print command, The Export command	
Input from other file formats .....	115
Importing file content, Importing other files	
Automatic editing options .....	117
Replace text and formatting, Paste options	
<b>Module 3.2: Paragraph formatting .....</b>	<b>122</b>
Lists with bullets and numbers .....	122
Customised lists, Multilevel lists	
Drop Caps .....	127
Customised spacing .....	128
<b>Module 3.3: Page formatting .....</b>	<b>131</b>
Document formatting .....	131
Design themes, Cover page	
Headers and footers .....	132
Inserting fields, Different first page and odd/even pages	
Understand and use sections .....	135
What is a section?, Headers and footers in sections, Page numbers in sections, Sections and columns	
<b>Module 3.4: Tables, forms and templates .....</b>	<b>144</b>
Tables .....	144
Word forms .....	146
Introduction to Word forms, Creating Word forms	
Templates .....	150
<b>Module 3.5: Styles .....</b>	<b>153</b>
Introduction .....	153
Using existing styles .....	153
The Title style and Heading styles, Formatting a document using existing styles, Changing the style of a paragraph	
Changing and creating styles .....	155
<b>Module 3.6: Mail merge .....</b>	<b>160</b>
How mail merge works .....	160
Steps that must be followed .....	161
Editing the recipient list .....	163
<b>Module 3.7: Referencing .....</b>	<b>167</b>
Table of contents .....	167
Footnotes and endnotes .....	169
What are footnotes and endnotes?, Inserting footnotes and endnotes	
Captions .....	170
Citations and bibliography .....	172
Adding sources, Inserting citations	
Index .....	174

<b>Section 4: Spreadsheets</b> .....	<b>179</b>
<b>Module 4.1: Revising and improving spreadsheet skills</b> .....	<b>180</b>
Overview of basic concepts .....	180
Conditional formatting .....	181
Cell referencing .....	184
Relative cell referencing, Absolute cell referencing	
<b>Module 4.2: Calculations</b> .....	<b>188</b>
Functions .....	188
The ROUND function, The LARGE and SMALL functions, The POWER function, The Subtotal feature	
Interpretation of error messages .....	194
Finding help in <i>Excel</i> .....	196
Using the search box, <i>Excel</i> help feature, Getting help from Insert Function	
<b>Module 4.3: Decisions</b> .....	<b>199</b>
The IF function .....	199
The COUNTIF function .....	202
The SUMIF function .....	203
<b>Module 4.4: Charts</b> .....	<b>207</b>
Creating charts .....	207
Increasing the readability of charts .....	207
Placing a chart in a document .....	210
<b>Module 4.5: Working with worksheets</b> .....	<b>213</b>
Handling a worksheet as a whole .....	213
Basic actions, Protection of worksheets, Freezing rows and columns, Using different print options	
Linking data in worksheets .....	218
<b>Section 5: Databases</b> .....	<b>221</b>
<b>Module 5.1: Introduction to databases</b> .....	<b>222</b>
Introduction .....	222
The structure of a database .....	222
First encounter with <i>Access</i> .....	223
Working with tables .....	226
Changing the appearance and contents of a table, Sort and Filter, Performing quick calculations on fields, Printing a table	
Creating a table .....	229
The types of data which can be stored, Different views of a table, Field properties, Create a table	
<b>Module 5.2: Forms</b> .....	<b>237</b>
Viewing an existing form .....	237
The sections of a form .....	238
Creating a form .....	238
Use the Form command, Use the Form Wizard	
Edit an existing form .....	240
Inserting a combo box, A picture as a background for the form, Buttons for navigation	
Photographs as fields in a database .....	244

<b>Module 5.3: Queries</b> .....	<b>247</b>
The design and result of a query .....	247
Formulation of simple criteria .....	248
Creating a query .....	250
Queries with criteria for different fields .....	252
All criteria must be true, At least one of the criteria must be true	
<b>Module 5.4: Designing a database table</b> .....	<b>257</b>
Introduction .....	257
Design of the basic table structure .....	257
Identifying fields, Selecting data types and sizes, Selecting a primary key, Refining the table structure	
Design for more valid data capture .....	260
Giving a default value, Limiting the possible values, Using an input mask	
Why is accurate design important? .....	266
Design limits human error, Difference between valid and correct data	
<b>Module 5.5: Report</b> .....	<b>268</b>
First acquaintance with a report .....	268
Different sections of a report .....	268
Creating a basic report .....	269
Changing the appearance of a report .....	271
Calculations in a report .....	273
<b>Section 6: HTML / Web design</b> .....	<b>277</b>
<b>Module 6.1: Basic concepts of web design</b> .....	<b>278</b>
Introduction .....	278
Review the use of markup tags .....	278
Alignment of text .....	279
The cite tag .....	280
HTML tables .....	280
Solve problems with web pages .....	282
<b>Module 6.2: More web design techniques</b> .....	<b>285</b>
Introduction .....	285
Planning a website .....	285
Adding images .....	286
Creating lists .....	288
Creating hyperlinks .....	290
<b>Section 7: Information Management</b> .....	<b>295</b>
<b>Module 7.1: Artificial Intelligence</b> .....	<b>296</b>
What is AI? .....	296
Training AI .....	297
AI is a convergent technology .....	299
AI in education .....	299
Positive impact of AI on education, Challenges and concerns AI and academic integrity, AI and Big Data	

<b>Module 7.2: Finding information</b> .....	<b>304</b>
Introduction .....	304
Formulating a task definition .....	304
Determining what data and information is needed .....	306
General tips on formulating questions, Check the quality of your questions	
Checking the quality of information .....	308
Authority, Accuracy, Currency, Objectivity, Coverage	
<b>Module 7.3: Processing information</b> .....	<b>311</b>
Introduction .....	311
Exporting and importing .....	311
Exporting from <i>Access</i> , Importing into <i>Access</i> ,	
Importing into and exporting from <i>Excel</i>	
Tips, tools and techniques to process data .....	315
Sorting as a problem-solving tool, Spreadsheets, Databases	
<b>Module 7.4: Presenting results</b> .....	<b>321</b>
Introduction .....	321
Different ways of reporting .....	321
Compile a report .....	322
The structure of the report, Finalising the report	
<b>Section 8: Integrated Skills</b> .....	<b>325</b>
<b>Module 8.1: Working smarter</b> .....	<b>326</b>
Integration .....	326
Using templates to work smarter .....	326
Using <i>Excel</i> to solve problems .....	327
Guidelines when solving problems with <i>Excel</i> , Troubleshooting	
Using <i>Access</i> to solve problems .....	330
Guidelines for problem solving with <i>Access</i> , Troubleshooting	
Use HTML to share information .....	333
<b>Module 8.2: Case studies</b> .....	<b>336</b>
Mini scenario 1 .....	336
Mini scenario 2 .....	337
Mini scenario 3 .....	338
Mini scenario 4 .....	339
Mini scenario 5 .....	340
Mini scenario 6 .....	341
Mini scenario 7 .....	342
Mini scenario 8 .....	342
Mini scenario 9 .....	343
<b>Index</b> .....	<b>345</b>
